Emmanuel Masengesho

Frontend Developer · Kigali, Rwanda

Profile

Passionate Frontend Developer with hands-on experience building responsive, accessible, and high-performance web applications. Currently completing an intensive web development internship where I have delivered production-quality projects using HTML5, CSS3, and JavaScript. I thrive at the intersection of clean code and thoughtful design, and I am eager to contribute to a team building products that matter.

Experience

Frontend Developer Intern

Tech Internship Program · Kigali, Rwanda · Jun 2025 – Present

- › Built a fully responsive portfolio website from scratch using semantic HTML, CSS, and vanilla JavaScript, meeting all professional design and accessibility standards.
- › Developed an e-commerce admin dashboard with real-time data visualizations, modular component architecture, and mobile-first responsive layouts.
- › Participated in daily standups, code reviews, and agile sprints — delivering all tasks on time and to specification.

Web Development Volunteer

Community Health NGO · Kigali, Rwanda · Jan 2024 – May 2025

- › Designed and built a community health tracker web app used by 3 local NGOs to record and visualize patient data.
- › Trained 8 non-technical staff to use the application, writing clear documentation and conducting onboarding sessions.

Education

Bachelor of Science in Computer Science

University of Rwanda · Kigali · 2022 – 2025

- › Graduated with honors. Coursework: Web Development, Data Structures, Algorithms, Software Engineering.
- › Capstone project: Community health tracker web application, adopted by 3 NGOs.

Web Development Bootcamp — Certifications

freeCodeCamp & The Odin Project · 2023 – 2024

- › Completed 600+ hours in HTML, CSS, JavaScript, and React. Built 12 portfolio projects.
- › Earned: Responsive Web Design, JavaScript Algorithms & Data Structures certifications.

Key Projects

Portfolio Website [HTML5 · CSS3 · JavaScript]

Fully responsive personal portfolio with dark/light mode, smooth scroll, animated sections, project filtering, a validated contact form, and a blog with modal post viewer.

E-Commerce Dashboard [React · Node.js · Chart.js]

Admin dashboard for managing products and orders with real-time charts, modular components, and responsive layout across all device sizes.

Recipe Finder App [JavaScript · REST API · CSS Grid]

Mobile-first recipe discovery app with ingredient-based search, dietary filters, and an intuitive card layout fetching data from a public food API.

Achievements & Interests

- › Top 10 Finalist — Rwanda Tech Hackathon 2023 (60 teams): built complete fintech prototype in 48 hrs.
- › Interests: open-source contribution, accessibility advocacy, UI/UX design, tech community mentoring.
